Blackboard learn+

Copying Selected Content Directly from Campus Pack into Blackboard
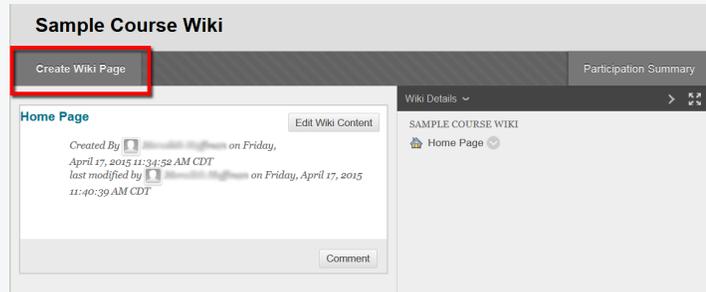

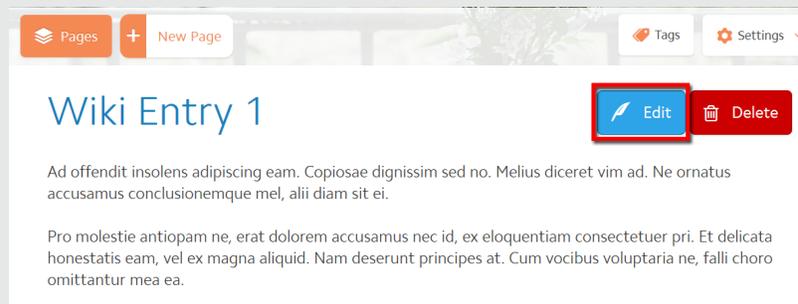

If you only need to copy selected content from your Campus Pack Blogs, Journals, and Wikis and do not require a permanent record of the material, then you can simply copy content directly from Campus Pack into your new Blackboard Blog, Journal, or Wiki. The instructions below pertain to Blog, Journal, and Wiki content. To learn more about creating a wiki, view the Creating a Wiki quick guide.
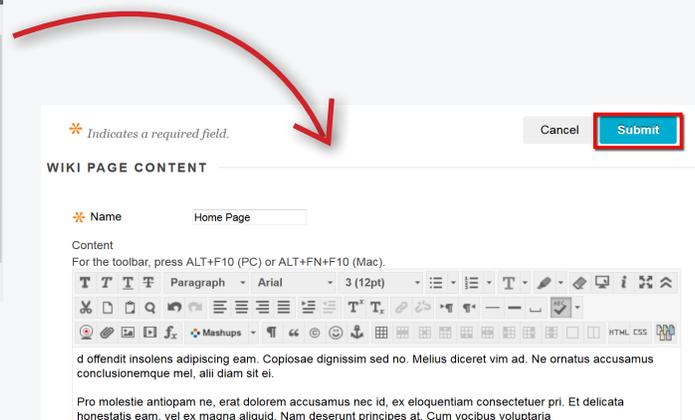

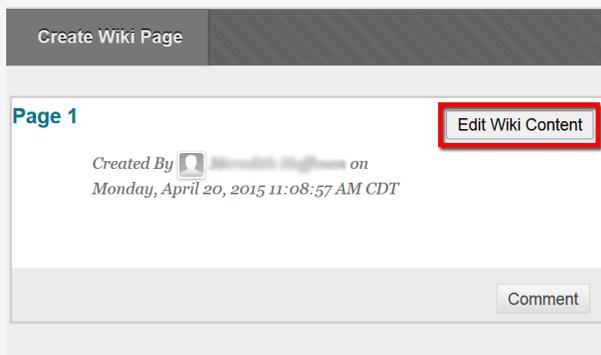

1 In a newly created Blackboard Wiki, create a new page for each of the pages that were contained in the Campus Pack Wiki.

2 Go to the Campus Pack Wiki that you woul like to copy from and navigate to the desired page. Click "Edit" to access the content. Select the content you wish to copy. On your keyboard, click `CTRL` + `C` to copy.
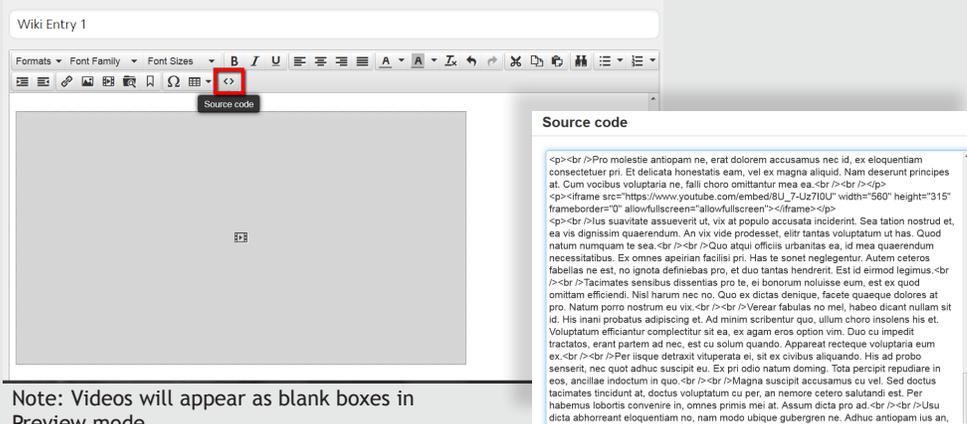

3 Return to the new Wiki page you created in Blackboard and select **Edit Wiki Content**. Click in the Content Editor, and then click `CTRL` + `V` on your keyboard. Click **Save**.

④ Note: Images may or may not copy depending on how they were embedded in the original, and the image may have to be manually reattached. Use the method below for embedding tables and video links:

- Click the **Source Code** icon to open the **HTML Source Code** from the Campus Pack Wiki. Select the text and click [CTRL] + [C] to copy.

Note: Videos will appear as blank boxes in Preview mode.

- Return to the new Wiki page you created and, select the **HTML** icon, which will then bring up a box titled **HTML Code View**. Right click and select paste, or click [CTRL] + [V] on your keyboard. Click **Update**. This will preserve tables and video links.
